REASONS FOR ALLOWANCE

Independent claims 1, 7, 12, 15, and their respective dependent claims are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach the specific combination of elements as claimed. In particular the prior art fails to teach *inter alia* a pair of simulated night vision goggles; an image generation system generating three separate high fidelity, infrared, computer radiated terrain images, each computer radiated image allocated to a portion of a total dynamic range of irradiance and driven by successively higher order bytes of digital video; optically combining the outputs of the three infrared computer radiated terrain images simultaneously to stimulate an image intensifier tube to provide about 200dB dynamic range of irradiance and to provide sufficient dynamic range of irradiance to the image intensifier tube to simulate direct viewing of bright lights; and scan converting a resulting image generated at the output of the image intensifier tube for display on the simulated goggles. The closest prior art of record does not teach or fairly suggest this feature in the combination.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cameron Saadat whose telephone number is 703-305-5490. The examiner can normally be reached on M-F 8:00 - 5:00.
